

Touch Screen Solutions

DX890

Quality, Reliability, Affordability

DX890

DX890

For the last two and a half decades, Uniwell has focused exclusively on developing fast, reliable and affordable EPOS systems; we've been so successful that many of our earliest models are still being used today, over 15 years on.

Choice of Touch Screens

Uniwell can offer the benefits of new touch screen technology to an even wider range of customers with this touch screen model that delivers a powerful mix of reliability, speed and affordability. TFT display provides outstanding color definition, wide viewing angles and ultra high brightness.

Reliable Hardware

Designed specifically for Point of Sale, it combines solid state memory, passively cooled electronics and embedded software. With no moving parts they deliver time and time again, providing an extremely reliable solution capable of withstanding the challenging conditions found in hospitality and catering environments.

Embedded Software

Uniwell have been developing POS software for the past 25 years. The result is a system that truly reflects the requirements of hospitality and catering operators located anywhere in the world. The flexibility of the software enables the system to be configured for bars, night clubs, restaurants, café, catering, quick service and hotels.

Protecting Your Investment

With both the hardware and software from the same supplier, incompatibility problems are a thing of the past. It also ensures that the software does not outgrow the hardware, protecting your investment in our technology. As a result of the product being available from Uniwell's distributor, you have a choice of the best service and support in the industry.

Flexible Networking

DX890 is designed to use standard Ethernet networking, the TCP-IP protocol enables the model to run on existing local area networks, wireless networks and across wide area networks. The FTP protocol is used to communicate with back office software and 3rd party applications, providing fast and flexible communications.

Choice of Printers

Uniwell has a range of order / receipt printers, either thermal or dot matrix, that can be installed as part of the EPOS network. Order printers can be configured to automatically redirect to a backup printer in the event of a printer problem.

Alternatively, a choice of industry standard RS232 or Ethernet printers are available from leading manufacturers such as EPSON and Citizen.

DX890**DX890**

Highlights

- *Quality hardware*
- *Simple and fast to operate*
- *Low maintenance*
- *Low total cost of ownership*
- *Choice of suppliers*
- *Regular software updates*

EPOS Software

The flexibility of the software enables the system to be configured to suit different market sectors and styles of operation. Staff at all levels of your business will see the benefits of a Uniwell touch screen system.

Operators will appreciate the simplicity and speed of operation, helping them to provide an efficient service with more people spending and less people waiting. Forget scribbled checks, kitchen staff are provided with clear and quickly printed orders helping to prevent mistakes. Managers are provided with the tools to achieve tight cash control - reduced discrepancies and increased margins.

Software Features at a Glance

Real Time Interfaces

- Real time floating clerks & tables
- Clerks, bill numbers, tables, seats
- Customer account & invoice system
- Bill pickup by customer name
- Multiple bills per table
- Split bills by item or quantity
- Table Plan (Ethernet versions)
- 9 prices per PLU - 3 price levels
- 5 menu levels
- Auto price & menu changes by day and time
- Multi buy & meal deal promotions
- Flexible menu configuration
- Side dish and extra's prompts
- Auto broadcast product updates
- Time & attendance
- Labour costing
- Seat number system
- Pouch system
- Drive thru / walk thru system
- Eat in / take out system
- Ticketing system
- Interval drinks system
- Multiple order printers with backup
- Intelligent receipt printing
- Euro and multi currency
- Real time flash sales report
- Detailed operator analysis
- 100+ management reports
- Electronic journal
- Remote till to till monitoring
- Auditors report
- Screen Saver
- In-store marking Price/Weight embedded bar-code
- Cashier sign-on with bar-code scanning
- Customer file/invoice pick-up with bar-code scanning
- Transaction void
- Hotel PMS
- Loyalty
- Journal data streaming
- EFTPOS
- Cashless payment
- Hand held ordering

Back Office Software

Management Information and Business Control

A choice of software is available from Uniwell. Software solutions are available for the small independent operator right up to large multiples that require centralized management systems and business intelligence.

Tensai2000

Tensai2000 (Tensai means "Genius" in English) is designed to facilitate EPOS programming (PLM2000) and report taking (t-Repo). Tensai2000 enables you to control multiple ECRs of the same or different models over multiple sites. The operator can create the System Configuration of each installation site, and make it possible to communicate with each individual EPOS for programming update and report taking. (FTP communication available)

PLM2000

PLM2000 is the free software and designed to program one EPOS at a time. (FTP communication available)

Security

- Embedded software
- Secure from virus attack & hacking
- No reliance on central file server
- Keylock control

Reliability

- Rugged ABS plastic cabinet
- Instant power on/off
- No moving parts
- No fan to suck in dirt & dust
- Solid state CMOS memory

Flexibility

- TCP-IP network configurations
- Choice of standard peripherals
- Over 1000 configuration options

DX890

Hardware DX890

Screen	10.4 TFT, High brightness active matrix (Dual backlight) 256 colours 640 x 480 resolution
Touch	8-wire resistive
Processor	Toshiba TLSC900
Memory	Battery backed non volatile CMOS memory
Software	Embedded Uniwell application
Integral Customer Display	2 X 16 character
Networking	10BaseT on board
Serial Ports	3 x 9 Pin RS232
Cash Drawer Ports	2 x RJ11 cash drawer ports
Tilt adjustment	25° to 70°
Dimensions (H x W x D)	232mm to 303mm x 300mm x 352mm
Weight	5.0 kg
Internal Power supply	Protected from abuse & spills, no installation problems
Power consumption	50 VA

Options & Peripherals

Magnetic Stripe Reader	Track 2 (internal option)
Uniwell Cash Drawers	DW353 large size heavy duty 103mm x 440mm x 460mm (H x W x D)
	DW340 compact 100mm x 410mm x 415mm
